

DOE-NE Voucher Program for eligible small businesses accepting applications

As part of the Gateway for Accelerated Innovation in Nuclear (GAIN) initiative, the NE Voucher Program will provide up to \$2 million this pilot year for access to expertise, knowledge and facilities of the national laboratories and our partner facilities to help advance nuclear energy technologies. Additional NE Voucher Program information is available on the [Apply for a Voucher](#) page on the [GAIN website](#), including an expanded scope description, frequently asked questions, copies of the standard research agreements needed for the selected application, as well as the final Request for Assistance (RFA).

The application period starts March 1 and will extend through March 30, 2016. Voucher selection notifications will be made in mid-May.
